

MEMBER HIGHLIGHT

**MAVCON***— Another FCFCU Success Story*

FCFCU is pleased to be embarking on 10 years of service to MAVCON (previously Maverick Construction). Mavcon exceeded 18 million in sales for the 05' fiscal period and is expected to exceed 30 million for 06'. Mavcon's relationship with FCFCU began the year of its founding in 1997 with a loan for a dump truck while they were operating their business from the basement of their home. From these humble beginnings, Mavcon has developed into a dominant design-build services provider with unparalleled financial strength. From design through lease back, Mavcon continues to be selected as the "firm of choice" by many organizations undergoing an aggressive building program. James Dally President of Mavcon says, "I am appreciative of FCFCU and Jeff Cassada (then Branch Manager of our Comstock location; now Jeff oversees all branch operations for FCFCU) for believing in "the little guy" as he could not accomplish his dream without receiving a "hand-up" nor fulfill his true purpose of then giving a hand to another."

Mavcon is continuously on the move and has recently acquired aircraft to further equip their organization to service their geographically expanding client base. Mavcon is pleased to have provided construction services for such local clientele including FCFCU, Stryker Medical, MPI Research, Fluid Process Equipment, Spring Arbor and Cornerstone Universities, and Parker Hannifin among others.

Mavcon utilizes FCFCU's online banking and direct deposits to further assist in its quest for paperless management. FCFCU is proud to have been a part of Mavcon's successful business plan for the past 9 years and is looking forward to a mutually exciting future. For more information visit www.mavconusa.com.
